EDUCATION

University of Houston

Bachelor of Science in Computer Science, Minor in Mathematics

Houston, TX

Aug. 2023 – Dec. 2025

- **GPA:** 3.22
- **Relevant Coursework:** Data Structures, Algorithms, Operating Systems, Database Systems, Natural Language Processing, Digital Image Processing, Data Science, and Statistics.

Lone Star College

Associate's in Science

Houston, TX

Aug. 2021 – May 2023

EXPERIENCE

De Hoang Duy

Assistant Manager

July 2021 – Present

Houston, TX

- Help with digital content for website, including menu descriptions and photos, boosting customer engagement and online visibility.
- Built strong relationships with regular customers, enhancing their dining experience through being attentive.
- Handled multiple tasks efficiently in a fast-paced setting, including order-taking, coordination with kitchen staff, and payment processing.

University of Houston

Academic Support Assistant

Aug. 2025 – Dec. 2025

Houston, TX

- Provided weekly tutoring sessions to improve students' understanding of key subjects.
- Developed and organized lessons and custom-designed tests to meet individual learning needs and academic goals.
- Provided step-by-step guidance on correcting mistakes and understanding the underlying principles.
- Ensured that lessons were engaging and interactive, promoting a positive and motivating environment.

PROJECTS

Loan Approval Workflow System | Java, Spring Boot, REST APIs, H2/PostgreSQL

July 2026

- Built a loan approval web application with Java and Spring Boot that handles loan submissions, tracks application status, and allows managers to approve or reject applications.
- Designed a responsive web interface using HTML, CSS, and JavaScript that communicates with the backend API to submit applications and display results.
- Used an H2 database to store loan applications and implemented logic to approve/reject applications.
- Implemented a clean architecture separating frontend, business logic, and database layers, making the code organized and maintainable.

Binary Search Engine | Python, Pandas, NLTK

Aug. 2024 – Dec. 2024

- Developed natural language processing (NLP) techniques to retrieve and filter product reviews, focusing on aspect-based opinion queries using various algorithms (Boolean search, n-gram analysis).
- Implemented multiple methods (including baseline models and custom-designed algorithms) to extract relevant product features and sentiment, optimizing retrieval accuracy.
- Conducted data preprocessing, including text tokenization, lemmatization, and rating-based filtering, to improve the efficiency of review retrieval.
- Evaluated retrieval models through precision, recall, and relevance metrics, successfully identifying meaningful improvements over baseline approaches.

TECHNICAL SKILLS

Languages: Java, Python, C/C++ (Learning), SQL, JavaScript, HTML/CSS

Frameworks: Node.js, Spring Boot, Tailwindcss, React

Developer Tools: Git/Github, VS Code, PyCharm

Library: React, Spring Data JPA
